

Education

BS Software Engineering | Florida Gulf Coast University | August 2022 - May 2026

Work Experience

Help Desk Support Associate | FGCU ITS Helpdesk | May 2025 - Present

- Assist students, faculty, and staff with technical issues: two factor authentication, email server access, and software troubleshooting.
- Used SCCM to remote trouble shoot on network computers for end users
- Troubleshoot TCP/IP connectivity problems involving DNS, DHCP, and network authentication
- Documenting issues and troubleshooting steps with Zendesk
- Managed computer and users on university network using Active Directory

After School Program Assistant | Naples Classical Academy | August 2024 - February 2025

- Organized after-school sports for 60 students: soccer, basketball, flag football, and four-square.
- Assisted students with homework
- Started new initiatives. Demanded that the school provide books for after school.

Leadership & Involvement

Treasurer | Software Engineering Club | January 2023 - 2026

- Purchasing marketing tools: cameras, tripods, and a cart
- Getting purchase orders approved through FGCU Student Involvement before the event.

Learning Guide | Annual FGCU Summer Coding Camp | July 2025

- Guided students through beginner coding challenges in Python
- Managed and troubleshoot student development environments, including configuring IDEs and resolving software installation issues to minimize learning disruptions.
- Answering their coding questions about Python

Projects

Family Connect Resource Management Portal | February 2026 - Present

- Developing a resource management portal for a local nonprofit by using React, Supabase, and PostgreSQL
- Designed and implemented relation data models and database schemas
- Integrated Supabase RESTful APIs for data retrieval and updated between frontend and database

RoundReady | August 2024 - December 2024

- This is a mobile application made to help resident housing assistants at universities. The app uses React.js for the front end and Node.js with SQLite for the back end.
- Created data tables using SQL.

Corvani Senior Software Engineering Project | September 2025 - May 2026

- Developed frontend for a data ingestion tool using React
